

Odyssey Families,

Today, Governor Carney ordered all Delaware public schools to close for the next two weeks (see attached). Schools will be closed through March 27, and children should stay home. We understand this closure action may pose added hardship for some of our families, but this time will allow for the creation of a plan and path forward for our students and school community as the COVID-19 coronavirus pandemic continues.

Over the next two weeks, we will continue to work with the Delaware Department of Education and the Division of Public Health to prepare for the potential impact that an extended closure could have on our students, their families, and our staff.

While your student(s) remains home, we encourage you to continue practicing good hygiene, which includes:

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.
- Get vaccinated for the flu if you have not already
- Don't shake hands or high five – consider a friendly toe tap or elbow bump

If you feel for any reason your child may have or has been exposed to COVID-19 coronavirus, please contact your doctor or the Coronavirus hotline at 1.866.408.1899 immediately. Virus symptoms can range from mild to severe and could include fever, cough, and shortness of breath. Symptoms may appear in as few as two days to as long as 14 days after exposure.

Odyssey Charter School has been preparing for a possible school closure and is in the process of determining the next steps for our students to continue learning while the school is closed.

We will remain in close contact with the State of Delaware and local public health officials throughout the duration of this closure and will provide updates to families as appropriate.

We encourage you to stay informed of the situation by regularly checking updates from [Division of Public Health](#) and the [Centers for Disease Control \(CDC\)](#).

We understand this is a time of uncertainty and concern. We will work through this together to keep our students, families, and staff safe.

Thank you for your cooperation and support, and we will be providing regular updates and next steps.

Sincerely,
Elias, Denise, Riccardo, and the Board of Directors
