

Technology Update - Chromebook/Device Distribution Schedule

Dear OCS Families,

The OCS IT and Transportation teams are working diligently to ensure that every OCS student will have access to a device to begin OCS Virtual Learning on September 8, 2020. Based on the latest parent survey, our OCS community has requested approximately 500 devices from the school. Due to an overwhelming global demand for Chromebooks and interrupted supply chains, we are prepared to address this overwhelming need before our ordered 1:1 technology arrives. While we are continuing to push for partial and rolling shipments of available units, we expect to receive our Chromebooks in October or November.

At present, OCS is ready to deliver functioning devices available for immediate use while we await the delivery of our new Chromebooks. Depending on the device, the school will donate or loan them to OCS families. These devices are a combination of laptops, desktops with monitors, and a small number of iMac desktops. All devices will be made available with a webcam so our students can immediately participate in synchronous Virtual Learning. Because OCS will not be able to monitor these donated or loaned devices, OCS will not assume any responsibility or liability for their proper or appropriate use.

To request a device for your student(s), please complete the [online form](#) **by 12 pm on Friday, August 21, 2020.**

Should your child(ren) have issues with their devices, please contact the OCS IT team at remote.support@odyssey.k12.de.us.
